Number 17

Celebration is Outstanding Success, 2,200 People Attend

Favored with good weather, and with a crowd of between 2,000 and 2,200 attending the Dominion Day celebration and Stampede, staged at Raymond on Dominion Day, and sponsored by the Raymond Board of Trade went over big, and will go down in history as an outstanding success from every angle.

From 9 a. m. when the children's sports commenced, until 2 a. m. Tuesday when the dance moment, and Tuesday was a day of yawning, stretching and waiting for evening to come so that tired people could retire.

Under the direction of T. Geo. Wood and his assistants, the kiddies who were on the grounds before 9 a. m. all received a free ice cream cone, and need less to say they were there 100 per cent. Then there were races for all ages for over an hour and prizes were given to all prize winners so that some of the kiddies had received a lot of refreshments before the sports were over.

PATRIOTIC PROGRAM

Shortly after 10 a. m. the program in the Opera House commenced with J. O. Hider as Chairman, and the following numbers were given:

"O Canada," by the congregation, and a flag drill by the Public School students. Invocation: Pres. H. S. Allen. Speech of Welcome: Mayor Wm. G. Meeks. Selection by the Band. "The Drummer," a drill by Public School children. Reading: Maureen Powelson.

Vocal Solo; Billy Mehew. Reading; Margaret Winn. Paratol Drill by Public School children. Patriotic Speech; Rev. J. M. Pritchard Lethbridge. God Save the King.

While the program was going on, New Dayton and Raymond played the first of a Double header in baseball, scheduled for the day, Raymond winning 12-6 from the visitors in an exciting game. Nielson for Raymond, and M. Nelson for New Dayton were on the mound for this game.

The Capitol Theatre was crowded at night, where Lea put on an exceptionally pleasing program, the big drawing card being the recently fought heavy-weight Championship bout between Primo Carnera, the Italian giant and Max Baer, who won the decision. The knock-downs were pictured in slow motion, and the entire picture was very interesting.

The biggest crowd in the history of the "Ramonion" gathered there at night, and from 10 p. m. until 2 a. m. danced to the music of the "Ramonions," the musicians being in fine form and treating the dancers to a real evening of entertainment. The dance was operated on the jitney plan, and proved a big financial success to the Stampede Committee and a splendid social success to the large but orderly crowd who were dancing there, one of those in charge stating that he had never seen such a large crowd at a holiday dance who were better behaved than the crowd Monday night.

Very Successful Primary Convention

A very successful three day Primary Convention was held in the Second Ward chapel, beginning Monday, June 25th.

There were two members of the General Board present from Salt Lake City, viz., Miss Helen Davis and Miss Lenore Cornwall. Accompanying them were, Miss Wilma Jeppson of the B. Y. U., nationally known instructor of Physical Education, Miss Edith Young piano accompanist for Miss Jeppson, and Miss Elizabeth Cornwall, Music director.

The rain on Tuesday resulted in a decrease in the attendance, but they were all back in force Wednesday with a record for the Convention of 125.

Miss W. Jeppson in her six classes on "Fundamentals of Dancing," "Physical Exercise," "Ball Room Etiquette" and "Social Entertainment," radiated much enthusiasm. The man who came as spectators became participants and went home feeling much younger. Wednesday morning she gave an excellent talk on "Home Recreation."

"Take play from work and you have drudgery. Take work from play and you have a waste of time. Take play from a child and you take its life."

The theme of the Convention was "Leisure Time Activities for Children," and "Responsibilities of Primary Workers." Mesdames Irene Redd and Nora Bullock, Primary presi-

dent of the Taylor and Lethbridge Stakes, conducted all of the meetings.

Monday and Tuesday evenings were spent in a "Happy Play Hour" for the public, conducted by Miss Jeppson. And was it happy? Just ask those who were there. Monday night it was held in the 2nd Ward Chapel, but due to the size of the crowd it was deemed advisable to hold the Happy Play Hour in the Opera House the following night. Although the floor was much larger it was hard trying to keep out of each other's way. The storm did not dampen the spirits of the crowd, but then just try and stay "down in the mouth" with Miss Jeppson around.

The meetings commenced at 10:30 a. m. and 2 p. m. Lunch was served in the church at noon for all those who were in attendance.

Instruction were given to all of the class leaders of each of the six Primary groups.

I. B. Roberts is taking the delegates back to Salt Lake City by car. We wish him good luck on his way and to be careful of all of the Misses.

Miss Jeppson, in her farewell speech gave Canada, a great compliment, and incidentally, she has been all over the world. She said, "I like Canada's hospitality and friendship. You have all been splendid sports. Three cheers for Miss Jeppson."

WEEKLY LETTER

Eradicating Canadian Thistle by Black Fallow

Canada Thistle is a weed that is steadily chiseling its way more and more each year into an increasing number of fields of our best farm lands. This weed is a persistent and unrelenting foe that can be given little or no quarter if it is to be brought under control and readers of this letter will be interested in some recent findings in Canada thistle eradication, made in Saskatchewan at the experimental sub-station near Regina. Your writer visited there last year and was shown where heavily infested areas of Canada thistle had been completely eradicated in one season by keeping an absolutely black fallow from about July 20th to September 10th.

The work, it must be pointed out, was carried on in years of light rainfall which no doubt helped in the eradication of the thistle and there may be some question about the method used being so completely successful in years of heavier rainfall on well irrigated land. However, the principle used is sound enough so far as the eradication of Canada thistle is concerned and should be effective in fighting this weed even under more moist conditions.

Canada thistle spreads chiefly from runners or horizontal root stalks that are generally found from 6 to 10 inches below the surface. Runners from a single plant may spread 4 to 10 feet in some soils, if moisture is favorable, and being a perennial the Canada thistle, with so much underground growth, is able to store up an abundance of nourishment one season for use the next. This is what makes the eradication so difficult.

The black fallow method of eradication used at Regina is based on the fact that the food reserves in the root systems is lowest in mid-summer and as

pointed out in a report covering the work the prevention of too growth at this period of the year is especially important in that it prevents the further manufacture of food in the leaves thus causing the plants to resort to the diminished food reserves in the roots until they are actually starved to such an extent that death occurs.

In the tests conducted at Regina the annual weeds were controlled by ordinary fallow till about July 20th and from then on until September 10th the thistle infested areas were worked every 7 to 10 days at the beginning of the period and from 12 to 14 days at the end of the season. A well sharpened duckfoot and a red weeder used alternately were found best. The red weeder is very effective in cutting the shoots off below the ground surface. The use of the duckfoot keeps the ground loose enough for the thistle shoots to be cut off below the surface. An ordinary disc is not satisfactory because it leaves too many shoots uncut.

A danger in using this method of eradicating Canada thistle is that the soil is so finely pulverized by the frequent cultivation that it is very apt to drift. For this reason fall plowing at least 2 inches deeper than the land has been cultivated is recommended or else seeding to fall rye especially where the soils are very light. There is also the danger of pale weevil or cutworm infestation where the moths of this insect may be flying and the surface soil is kept in such loose condition for them to deposit their eggs during August. Eradicating Canada thistle by the black fallow method therefore involves risks that can only be taken if it would seem on land or patches that are heavily infested.

For controlling Canada thistles on irrigated land the growing of alfalfa has been found to be the best and most practical method.

Crowds Throng Stampede Grounds

From about 12:30 until nearly 4 p. m. cars were filing into the Stampede grounds, and for a good part of this time the ticket sellers were very busy indeed. Parking space around the arena was at a premium and all along the north fence of the enclosure the cars were packed solidly, the event started at 2 p. m. and from then until nearly seven, there were very few idle moments, except the unavoidable delays in handling such a show. The bucking horses were doing their best and several of the boys bit the dirt hard, although none of them were injured. Races were good and most of them so close so that excitement was high all afternoon.

In the 1/2 mile races Meek and Bingham were to the fore all the time, and the Pony races saw the horses of the Legg and Powelson boys, and the Heninger speed artists cut a front in most of them.

Winners in the bucking were Herman Linder, Mel Bascom and Art Lund, 1st, 2nd and 3rd in the order named, and roping honors went to Herman Linder, 24 seconds; Pat Burton, 24 1/2 seconds, and D. Forsyth, 25 seconds. In the average time for two calves roping for the thoroughbred horse donated by Ray Knight and the entry fees of the contest, J. D. Forsyth was first in 27 1/4; Gordon Dubray 2nd in 27 4/5; Pete Bruishead 3rd in 28; Toots Burton 3rd in 32; and Pat Burton 5th in 32. All the boys made good time on their catches, and nearly all of

them caught their calf, although no spectacular time was chalked up.

In bulldogging Art Lund was first, Andy Lund second, and Earl Bascom third. Arts time was 8 1/2 seconds. Several of the boys lost their steer, one knocked the steer over, and Andy bumped into the fence, but Andy was offside, and as soon as the steer stood up, Andy slipped the ribbon over her horn.

The roping for men over 50 went to Ray Knight, who roped and tied his calf in 42 seconds. Tom Three Persons was second in 50, and Jos. Snow third in 78. "Dad" Lund had bad luck in tying and the calf jumped up. The Indian Races were keenly contested, and the money was well distributed.

The Wild Horse Race was a fitting climax to the show, and the animals put up a real fight. One horse got away and took Jack Purnell for a ride around the arena on his stomach, and Jack had 15 minutes work spitting the dirt out of his mouth when he got through.

All in all the show was a great success, financially as well as otherwise, and the contestants all expressed their intention of coming back again next year for our annual Stampede.

At 6 o'clock, or shortly after, New Dayton met with Raymond in another baseball game, the decision this time going to New Dayton with an 8-5 score, so that the two teams called it a draw at the end of the day.

NEWS NOTES

Mrs. J. W. Evans and family are enjoying a visit this week from her sister and other relatives from Utah.

Another beautiful rain Wednesday night and Thursday morning, following a heavy shower Tuesday afternoon has added to an already nice supply of moisture and has freshened up crops and gardens again. Vegetation is growing so rapidly it probably has growing pains at times.

If we have overlooked your visitors or your activities, let us know and we will give publicity to these items next week.

The Calgary Stampede will be on next week and likely several local people will attend for a day or two.

Mr. and Mrs. T. W. Meldrum, Mr. and Mrs. R. V. Litchfield and Grandma Litchfield were at the Temple Thursday in "Birdy's" car.

Mr. and Mrs. John Salmon, Mrs. J. H. Walker, and Mr. and Mrs. W. L. Hansen of Chicago were in Cardston Thursday. Mr. and Mrs. Hansen are visiting with relatives here for a few weeks.

H. F. Hodge, formerly cashier at the Sugar Factory, now of Blackfoot, Idaho, and his family are visiting friends in the Raymond district for a few days. Mr. Hodge looks happy and jolly as ever and is receiving the glad hand from his old acquaintances.

Jack Hervey has just installed a tank in his shop to make gas for his welding outfit. This will do away with sending away the tanks so often for charging.

Paul Redd is in Edmonton marking Examination papers, having left early in the week.

Don't forget the Social Credit Meeting in the Town Hall tonight at 8 p. m. (Friday). If you are interested in this subject be on hand and take part in the discussion.

WEDDING BELLS

WATSON - LITCHFIELD

The marriage was solemnized at the Alberta Temple on Thursday, July 5th, with Pres. Edw. J. Wood officiating, of David B. Watson, eldest son of Mr. and Mrs. D. A. Watson and Miss Marie V. Litchfield, eldest daughter of Mr. and Mrs. Reid Litchfield in the presence of members and relatives of both families and several friends.

The young couple are popular members of the younger set, and are setting up housekeeping in their own home one block north of the school, which the groom has been working on for the past few weeks. We join with their many friends in wishing them a long and happy married life.

"The FIRESIDE PHILOSOPHER"
By ALFRED BIGGS

The generous rarely get rich.
Do your best and leave the rest.
The "yellow peril" of the world is gold.
Success builds targets for the envious.
Morcy is a jewel in the crown of justice.
Without sorrow we should not appreciate happiness.
Hattfelds demand less courage than daily life.
If you have to reduce your standards to be a "good fellow" you're with the wrong crowd.

Municipal Council Meets

The regular meeting of the Municipal Council was held Tuesday, with a full attendance of members present, and the usual business transacted. Questions acted upon included the following:

A settlement was made in connection with the D. H. Elton case, arising from the car accident at the nine mile coulee bridge some 16 months ago or so. This case has been hanging fire for considerable time.

A deputation from the Council was appointed to investigate purchase of an elevated grade, for use in the Municipality, and to submit specifications and prices to the Council at a future meeting.

A contract was signed with N. H. Bradley, District Engineer for the gravelling of the stretch of road from here to Welling, and work on this will be started as soon as details of the work can be arranged.

MAE WEST in "I'M NO ANGEL," at Capitol Theatre Saturday night. A real show.

Cardston voted "YES" for the gas franchise on Friday last to the tune of 164 to 7, and according to the contract with the Company gas must be ready for distribution within nine months of the starting of the first well, which must be under way within 90 days from the date of the vote. Cardston and her people are enthusiastic over the prospects an owe certainly wish our sister town oceans of good luck in the gas field.

Don't miss "I'm No Angel" at the Capitol Saturday night, featuring MAE WEST.

HON. R. G. REID IS NAMED AS PREMIER

TRASURER IS FINAL CHOICE OF U. F. PARTY

Hon. George H. Hadley Passed Over.—Brownlee Hands His Resignation.—Lieut.-Gov. Whishaw's Choice of Hon. N. Brownlee as His Successor.—R. G. Reid Named as Premier.

Edmonton July 5.—(C.P.)—Member of the United Farmers of Alberta government since its formation in 1921, Hon. R. G. Reid, provincial treasurer and minister of lands and mines today succeeded Hon. J. F. Brownlee as premier of Alberta. At 12:28 p. m. Mr. Brownlee announced to the press he had formally tendered his resignation at Government House, and been in session here two days as his successor.

NAME CABINET NEXT WEEK

Mr. Reid will be sworn in next Monday or Tuesday, it was announced, as he wishes until that time to name his cabinet.

Resignation of Mr. Brownlee which followed the civil action for damages against him by Vivian MacMillan, former government stenographer, was accepted by the United Farmers of Alberta executive after the long caucus. The damage action alleged seduction.

Shortly after noon Mr. Brownlee left for Government House to hand his resignation to Lieutenant-Governor W. L. Walsh. He was accompanied by Mr. Reid.

Mr. Brownlee's retirement from the premiership carried with the resignation of his entire cabinet, and Mr. Reid indicated his new cabinet would be built around the old.—Leth. Herald.

Editorial Column

AS IT APPEARS TO US

The events of the past week or ten days in connection with the seduction charges against Premier J. E. Brownlee et al. have proven just how far we are from the spirit of the teachings of Christ, especially when he said "Judge not that ye be not judged." And again, "Vengeance is mine, I will repay, saith the Lord."

When a trial was mentioned, and long before evidence had been heard, many people had Premier Brownlee catalogued as a guilty and indecent man. When the first day's evidence was completed, and the lurid and shameful reports came out in the newspapers, nearly every person had firmly decided that he was guilty of all that had been mentioned, was an adulterer and a despoiler of innocent women. At that time even the jury had not given a verdict, and yet because of our apparent delight in kicking a man when he is down, our minds were all made up that he should get all the law could give.

The counter-claim was dropped, and then everyone was certain that he was admitting his guilt, and that the trail need go no further. Then, when the jury had returned its verdict and Judge Ives had refused to file the decision until he had fully considered it, everyone knew, according to the gossip on the street that our Premier was guilty, and that Judge Ives, although referred to in very deprecatory terms by many, was merely trying to clear the defendant because they are old acquaintances, and was not interested in seeing justice meted out.

We ask in fairness, is that the attitude of an educated and civilized class of people, to take snap judgment, and even berate our judges because they fail to concur in even the decision of a jury, without consideration of the matter. We are not denying that all evidence submitted for the plaintiff in the case is not true. We certainly have no idea of condoning crime and wrong doing, nor do we believe nor agree with those who condemn without a possession of a full knowledge of the facts.

We are too prone to hit our fellow man when he is down. One day we land his accomplishments and his virtues. The next, because of a mistake, we condemn his every trait, and it is regrettable how we love to nurture our dislikes and our dislikes, and send our brother down to utter destruction, and even gloat over his misfortune and apparent failure. If we would think of these words, "Let him who is without sin cast the first stone," we would hold our tongues a little, and at least wait until facts had been established before abusing those who make mistakes and get on the slippery path. Fairness and charity to the wrong doer, would remove a great deal of our hypocrisy and guile.

The FIRESIDE PHILOSOPHER

By ALFRED BIGGS

Nobody loves an egotist.
Wisdom is better than wealth.
Waste no tears over yesterday.

HOW TO BE HEALTHY AND STAY HEALTHY

The following rules of hygiene should be adhered to:
EXERCISE—To those with sedentary occupations, a proper amount of well directed light exercise, such as walking, swimming and light gymnastics, are recommended. To those in middle life, the more violent forms of exercise should be indulged in only under the guidance of a physician.

BATHING—Either a tub or a shower bath should be taken daily. To some, cold baths are acceptable, followed by a brisk rubbing which acts as a general stimulant. To improve the general condition, Cabinet or Turkish baths or salt rubs will be found beneficial.

SLEEP—There should be eight hours of sleep in a well ventilated room, as proper rest and relaxation are essential.

DIET—The meals should be regular, well-cooked and properly balanced to contain meats, starchy foods, cooked and green vegetables, salads, fruits and pastries in moderation. Over-eating and alcoholic excesses should be avoided.

BOWELS—Regular habits. Many abnormal conditions can be corrected by proper diet and exercise.

GENERAL CARE—Proper clothing to meet the requirements of climatic conditions should be worn. Precautions should be observed in exposing the body to cold, wet draughts, etc., as nothing so quickly debilitates the system as repeated colds.

Thousands of men, women and children sufferers are treated for many other maladies, when their real trouble is that monster, the tapeworm. The sure signs of it are the passing of the particles of the parasite. Suggestive signs are loss of appetite with occasional greediness coated tongue, heartburn, pain in back, limbs and legs, dizziness, headaches, feeling faint with an empty stomach, emaciated, dark rings under the eyes. The stomach feels heavy, bloated, at times a crawling sensation from stomach into bowels is noticeable. Again, as if something moving toward the throat is felt. The patient has yellow skin, loses weight, has bad breath, spits constantly, absolutely ambitionless, no desire to work, always lazy. Epileptic fits are known to have been caused by these monsters, which sometimes grow over 50 feet. When it crawls into the windpipe it is liable to suffocate its victim. Get rid of this monster at once, before it undermines your health beyond help. Send \$5.50 for a treatment of Laxtan if you want to be rid of this horrible parasite. Laxtan is harmless even if you haven't a worm.

Sold only by the US Laboratory, 1086 USL Bldg., Box 2006, Hollywood, California. Not sold in drug stores. State age and sex. Laxtan is made up for you especially and it cannot be sent C.O.D., therefore the remittance must accompany the order. To insure package add 25c extra. Guaranteed. (Cut this out and put it away, it may come in very handy some day. Show it to some sick friend and he may forever be thankful to you for helping him out.)

A half-section grain farm in the Prairie Provinces when operated by one man and seven horses would be able to produce wheat at 79.5 cents per bushel, while when operated with a 10 h.p. tractor and two horses, the cost would be increased to 85 cents per bushel.—Dominion Department of Agriculture bulletin on prairie farm crop costs.

Precipitation during the rain on Monday and Tuesday was 1.37, which will make a welcome addition to a month of already liberal rainfall.

THE MOST Precious Beauty Aid

KNOWN TO SCIENCE

now embodied in a soft, fluffy-dry Face Powder

For centuries, the world's leading skin specialists have encouraged the use of Olive Oil. Its healing, soothing and softening properties are praised by beauty experts everywhere.

Heretofore, it was necessary to use Olive Oil in liquid form to get its beneficial effects. But now this precious beauty-aid is blended in a soft, clinging face powder known to millions as **OUTDOOR GIRL**.

Because of its unique Olive Oil base, **OUTDOOR GIRL** Face Powder acts as a softener of sun-dried skin. It frees the complexion from redness and roughness. Keeps the skin young, firm and supple.

Try this different face powder today. In 7 smart shades to blend naturally with any complexion. The Good Housekeeping "Seal of Approval" is your guarantee of quality.

OUTDOOR GIRL Face Powder and other **Olive Oil** Beauty Products are sold by leading drug, department and chain stores in 3 sizes—15c, 25c and \$1.00. If you want to sample five of the most popular **OUTDOOR GIRL** preparations, mail the coupon below.

Crystal Products Co., Ltd.
427 St. Francis Xavier Street
(Opp. O.C.B. Montreal, Can.)

THE RAYMOND PHARMACY

Baby Clinic Very Successful

Mrs. A. W. Kirkham reports that 187 babies were examined at the baby clinic which was held in the United Church this week under the auspices of the Women's Institute, and was considered very good indeed.

Miss Lonsdale, the visiting nurse was delighted with the attendance, and also with the splendid physical condition of the children, 36 of the number being perfect and only minor ailments in the remainder, with no indications of anything serious.

Miss Lonsdale goes from here to Spring Coulee and then to Cardston where she will also conduct clinics.

IDAHO IS VERY DRY

Mrs. T. O. King and Mrs. W. A. Heninger returned this week after attending a family reunion of the Allen and Oborn families in Rockland, Idaho, where they report a most enjoyable time in meeting with relatives and family friends, and becoming better acquainted with the ever widening circle of family members.

Mrs. King reports conditions in Idaho as very discouraging, and this summer as very dry. Even in the irrigated areas water is so scarce that they cannot get enough to do any good, and crops a complete failure, hardly any fields giving promise of any more than enough for flour. Pastures are burned brown, there are no hay crops and stock is as thin as it usually is at the end of a hard winter. Farmers are wondering just what to do. One little valley gives promise of fair crops, but the rest of the state, as far south as they travelled, was brown and withering.

When they entered Montana on the way home and crossed the mountain range, the vista was entirely different, fields and pastures showing green and healthy and giving promise of abundant crops of every description. They travelled on the business to Pocatello, and report a very enjoyable trip.

Miss Helen McLean of Cardston spent Sunday night and Monday with relatives in Raymond.

THE BIG DEPARTMENT STORE

WEEKLY LETTER

Haying is about two weeks earlier than usual this year and favourable haying weather continuing the first cutting of alfalfa will nearly all be stacked by the time this letter appears in print. The station's foreman is obviously intent on making hay while the sun shines and the chinook wind blows, and the sound of the mowers with the fresh swaths of hay gives the fields a real haying time atmosphere. This week's letter gives the method of curing alfalfa hay that has been found most advantageous for reconditions at this station. These observations mainly by Dr. W. H. Fairfield, station superintendent should be of timely interest.

The leaves on the alfalfa plant contain the most valuable of the feed in alfalfa hay. In curing the hay the object is to retain as large a proportion of the leaves as possible. This is more difficult than would appear at first thought. If the hay is cut and allowed to dry in the sun the stems of the leaves, being small, dry before the leaves and the stalks and consequently break off easily in handling. To avoid this the hay after being cut, is raked into windrows as soon as it has wilted sufficiently to be gathered satisfactorily by the rakes. With ordinary good drying weather this requires about one day. Four or five hours after the alfalfa is windrowed it is put into small cocks by hand. Too many leaves are broken off if the hay is bunched in the windrow with a rake. In case of rain before the hay is ready to stack, the small cocks put up by hand are allowed to dry out on top and then merely rolled over without shaking.

In this way all of the leaves in the interior are left intact and by keeping the size of the cock down to about one big fork full of hay the alfalfa can be dried with a minimum amount of turning. Grass hays such as brome and timothy do not have to be handled as carefully as this; but poor quality alfalfa hay is too frequently produced when

an attempt is made to cure alfalfa in the way that ordinary grass hay is cured.

It is interesting to note that in alfalfa countries where the climate is very dry such as in California or parts of Utah and Idaho, the common practice is to put two mowers and a hay rake in the field at the same time. The rake follows immediately behind the mowers and the alfalfa hay can be picked up clean before it has a chance to wilt. Small cocks are made and the hay is actually cured entirely in the cock rather than in the swath and in the windrows. This produces hay not only of very fine color but of excellent quality in that practically all of the leaves are retained. Unfortunately this method is not satisfactory in the Lethbridge district as it would take too long for the hay to cure in this way under our conditions.

The quality of alfalfa hay is much improved especially as far as the first cutting is concerned if it is cut at an early stage of development. The most desirable time is just when first blooms appear, or as soon as put it, when one tenth of the plants are in bloom. The hay cut at this time has a higher feed value than when cut at any other time. This is due to the fact that the plants are allowed to come into full bloom many of the basal leaves turn yellow and drop off during the curing process, while the percentage of protein drops sharply as the plant gets more mature and the proportion of crude fibre or indigestible part of the plant increases.

The Calgary Exhibition

There is no doubt about the fact that the Calgary Exhibition and Stampede, to be held July 9th to 14th, will be a great success. The co-operation that is being extended and the special features that have been arranged are exceptional. In addition to celebrating the 50th anniversary of the Incorporation of Calgary, there are the usual features that will be staged on a larger scale than ever before. These will include livestock, industrial and domestic exhibits for which the prizes have been increased by over \$1,000.00; the Stampede Parade; the Stampede for which H.R.H. The Prince of Wales has just donated a chal-

TRACTOR RACES TO BE FEATURED AT WESTERN FAIRS NEXT MONTH

Visitors to the Western Fairs and Exhibitions next month will have the unique experience of seeing farm tractors streak around the race track at mile-a-minute speed. One of these tractors—the famous Allis Chalmers No. 999, which holds the world's speed record for tractors, will be driven by Louis Meyer, famous racing driver, who will use the new low pressure Firestone Farm Tractor Tires. Meyer is the only man who has ever won three A.A.A. Championships, and is one of the pair who have twice won the Indianapolis Speedway Race.

Since their introduction several years ago, pneumatic tires for tractors have met with great success. All equipment manufacturers have adopted them and tests show that tractors with these tires are able to do 27 p.e. more work with 24 p.e. savings in fuel, while the tractor life is extended 33 p.e. and repairs reduced by 50 p.e.

Farmers of the High River district U. F. A. passed a resolution recently favoring a weekly half holiday during the summer months, the time to be spent in social gatherings and sports such as baseball, etc.

Canada Thistle flourishes in varying degrees in all parts of western Canada. It is a native of Europe and was one of the earliest weeds introduced into Canada. The North-West Grain Dealers Association has financed a survey conducted by Professors G. P. McKostie and W. Tildesley, weed control authorities of the Agricultural College of Manitoba University, to determine most satisfactory means of controlling this weed. The results of this study have been prepared in pamphlet form and these are now available without charge at all line country elevators along with other pamphlets dealing with control of Couch Grass, Sow Thistle and details as to the loss caused through weeds in Western Canada.

Canada thistle spreads through seed, running roots, seed grain and manure. It causes damage through crowding out field and forage crops; by taking plant food and moisture from and reducing value of crops; by increasing the difficulty of cultivation and making necessary the purchase of special machinery as well as causing increased cultivation and more frequent summerfallow. The booklet outlines that the means of controlling this weed is through keeping the infested land entirely black for one complete growing season. Means of doing this are outlined for various types of soil as well as control through chemicals and smothering. Much valuable information is contained in these pamphlets and farmers are urged to obtain them from any line elevator agent.

Mr. and Mrs. John S. Smith of Cardston were Stampede visitors here Monday.

Lee Brewerton is the proud owner of a new Oldsmobile.

Special railway passenger fares are to be in force from Saskatchewan, and Alberta and B. C. mainland points, and two special excursions will be run from Alberta and British Columbia mainland points good going July 10th and returning to the 12th, and good going July 13th and returning to the 15th, with an additional two days return limit from B. C. points. There will also be special low fares.

Very low admission charges will be in force and the programme will without question be the best ever arranged for the Calgary Exhibition and Stampede. Prize list of the Exhibition, the Stampede and races, folder, hanger and general information may be obtained from E. L. Richardson, General Manager, Calgary.

LOOK OUT FOR THESE SYMPTOMS OF CONSTIPATION

Get Relief with Kellogg's ALL-BRAN

Headaches, loss of appetite and energy, sallow complexions, and sleeplessness are often warning signs of common constipation. Unless checked, constipation may impair health.

Today, you can usually get rid of common constipation by eating a delicious cereal. Laboratory tests show that Kellogg's ALL-BRAN provides "bulk" and vitamin B to aid regularity. ALL-BRAN is also a good source of blood-building iron.

The "bulk" in ALL-BRAN is much like that in leafy vegetables. Inside the body, it forms a soft mass. Gently, it clears the intestines of wastes. How much better than taking patent medicines.

Two tablespoonfuls daily will overcome most types of constipation. Chronic cases, with every meal. If seriously ill, see your doctor. ALL-BRAN is not a "cure-all."

Enjoy ALL-BRAN as a cereal, or use in cooking. Appetizing recipes on the red-and-green package. At all grocers. Made by Kellogg in London, Ontario.

FILTRATION

Underneath the lower ribs, on either side of the back-bone, are two bean-shaped organs about the size of the fist, the kidneys. The function of the kidneys is to rid the body of waste products and to regulate the chemical balance of the blood. A disturbance of the kidney function means that the kidneys, for one reason or another, are unable to do their part in the excretion of waste allowing materials to pass which should be retained, thus upsetting the chemical balance of the body.

Blood is brought to the kidneys by one of the large arteries. In the kidney this artery divides into many small branches, and then further subdivides until the smallest size artery, or capillary is reached. The blood is then passed through one of the four or five microscopic filters which are to be found in the kidney, a living filtration plant which removes from the blood the impurities present in the blood-stream as it reaches the kidneys are not functioning properly. Rest in bed, usually

kidney.

Because of the large number of filters, the kidneys have a tremendous reserve, and so are able to carry a heavy load when required. Each day, many gallons are filtered, but of this quantity, only a small percentage appears as urine, because the kidney has the capacity to reabsorb, from the filtered fluid, only waste products and undesired excess of minerals and sugar which are got rid of, if the urine, by the normal kidney.

The proper functioning of the kidney is upset and, possibly, destroyed to some extent by a number of conditions which affect the kidney, notably, nephritis, or Bright's Disease, which occurs in acute and chronic form.

Acute nephritis is usually associated with some infection, such as scarlet fever or tonsillitis, where the germs that are responsible for the infection cause an inflammation of the kidneys. There is pallor and puffiness of the face, with swelling of the ankles. An examination of the urine shows that for several months, until all inflammation has ceased, no matter how well the patient may feel, together with a suitable diet, is the basis of treatment.

Chronic nephritis in individuals, under thirty-five years of age is usually the result of an acute nephritis. After thirty-five it is most likely an evidence of thickening and hardening of the arteries throughout the body, and so it is associated with an

increased blood pressure and changes in the heart. The kidney condition may be of comparatively small importance, as compared with the changes in other organs.

The first step in treatment is to assess the condition as it affects the different parts of the body. A quiet life, physically and mentally, light but nourishing diet, and the avoidance of strain or indulgences, are essential. The weakened state of the kidneys is met by demanding less from them through a regulation of diet and lessened production of body waste.

Wider Service for Rotary

One of the most diverting pastimes of the intelligentsia is endangered. Scoffing at "Rotaryism" is already on the way out. So many more glaring targets have recently come to light structure that we have heard in our social and economic fewer criticisms of Rotary clubs for indulging in "pseudo ethics" and "puerile culture." Should the suggestions for improvement just made—on invitation of Chicago Rotarians—by a committee of social scientists be followed, even less excuse would exist for such charges.

This committee while paying tribute to the ideals and services of Rotary, declares, "Fellowship of the old type is not enough," and calls upon the business men in these clubs to seize present opportunities for wider usefulness and more responsible leadership, it frankly points to one danger of mere luncheon club sociability:

Such a group becomes self-satisfied, self-contained, snobbish, cloistered, isolated and withdrawn from the outside world and its problems. The broader social consciousness and sensitivity of its members may be dulled by this type of pleasant association.

Here is a criticism which deserves attention of individuals and organizations far beyond the international borders of Rotary, for it is a hazard which nearly every one of us encounters in our overorganized and departmentalized society. And it should not be forgotten that one of the original ideas of Rotary was to break some of the barriers by selecting its members as representatives of varied occupations. This scheme has worked very well in bringing together the butcher, the baker, and the candle-stick maker, and has helped many men engrossed in business to widen their social and civic horizons.

Indeed, the present recommendations should be considered less as confirmation of former criticisms of Rotary than as an

opening for further extension of already expansive activities. The goal is that broader fellowship which Rotary has always sought. Certainly the open-minded thinking exhibited by many Rotarians and by the organization's excellent magazine is already carrying out the proposal for a less hesitant discussion of controversial matters. Certainly also business as a whole must have gained through recent trials a less vulnerable interpretation of the famous "service" slogan.

The political scientists dig right into the question of service versus profit, and advocate a self-respecting regard for profit. This is a wholesome attitude, for unless we are to have a socialist economy, profit is essential. The real difficulty is that in the past business men—Rotarians no more than others—have too often thought of profit in terms of material wealth alone. Frequently they have advocated service only as a lure to profit. Fundamentally this attitude is one of getting rather than giving. A truer concept sees profit in service itself. The preaching and practice of this view of service still affords Rotary and similar organizations a splendid opportunity for usefulness.—Christian Science Monitor.

"I'm No Angel" is playing at the Capitol Saturday night and is said to be 100% entertainment. See it.

Bishop Walker and son Fay were in Drumheller on Dominion Day to the Provincial Track Meet where Fay took part and won 1st in the Pole Vault, 3rd in the Discus, and 4th in a couple more events. Coming home they hit a cloudburst between Macleod and Lethbridge, and the Bishop said it was like driving through a river for a few one could see out of the car being where the windshield wiper was working.

The Taylor Stake Track and Field Meet at Stirling on Wednesday was fairly well attended, although the roads were no joke when the travellers tried to get home in the rain storm of the evening. One party said he was over an hour between here and Stirling. All wards were fairly well represented in the meet and a good spirit of rivalry prevailed throughout.

News Notes

Bills were printed this week for the Stirling Stampede which will be held on July 23rd. The usual good time is anticipated on that date.

Ray Knight and DeLoss Lund are both taking a car load of horses to the Calgary Stampede which opens Monday of next week.

Ellwyn Tollestrup's motorcycle took fire at noon Wednesday on the street by Mrs. McCarthy's home, and burned itself out in a few minutes. The cause is a mystery.

A Social Credit Class will be commenced in the Town Hall Friday night, July 5th, at 8 p.m. All those interested should enroll immediately and start at the beginning.

A Human Tendency

Too few business firms employ advertising to lessen their costs of selling.

Business enterprise today has two major problems: 1. To increase sales; 2. To lessen the cost of selling. Yet so many omit the use of advertising, despite their readiness to agree to the proposition that "advertising lessens the cost of selling."

We're frankly amazed at the avoidance of advertising in the face of the knowledge that it costs less to sell with the assistance of advertising than without it.

Strange, strange --- this human tendency to go contrary to what knowledge and experience has taught us is right!

To lessen your cost of selling, we commend to you an adequate campaign of regular advertising in . . .
